

securMeet

Peer to Peer video conferencing that can not be intercepted or leaked

Secured Conferencing for Professionals and Regulated Organizations

Secured with End-to-End encryption and Peer-to-Peer communication

Secured Conferencing for Professionals and Regulated Organizations

SecurMeet is a security-first conferencing solution, designed to guarantee maximum security for your calls and video conferences. Create a conference room with one click and let others join without creating an account. Features HD video and share screen function.

SecurMeet is available for download in the Apple App Store for MAC OS, Google Play for Android, MS Windows and on all platforms via our Web App at www.securMeet.com.

“*SecurMeet is built on the premise of offering high-quality conferencing while leaving us technically unable to read your data.*”

End-to-End Encryption

With AES-256 & Elliptic Curve Digital Signature Algorithm (512-bit), advanced key management and strict no-log policies

Peer-to-Peer Protocol

No middleman server, prevents snooping, even from your own IT staff

On-Prem & White Label

Can be installed in your private cloud or data centre, with custom branding & custom Apps

Security Features	SecurMeet	Zoom	Skype	WebX	Google Meet	MS Teams
End-to-End Encryption	✓	✗	✓	✓	✓	✓
